Experience

Staff Software Engineer at Google

August 2016 - Present

Cloud Commerce/Service Platform

Revamping the current multi-Cloud Commerce Platform, which powers billions dollar business for our partners on AWS/Azure/GCP/Softlayer etc, to next generation on top of Google Cloud

Staff Software Engineer at Google

April 2014 - August 2016 (2 years 5 months)

Build cutting-edge Google scale shared data infrastructure. I worked/am working on:

- Performance and efficiency across the stack
- Generic BI solution for all Google DisplayAds products
- Distributed SQL database and query engine
- Data management and datawarehouse
- Continuous data streams processing

I'm also interested in cloud computation, cluster management, data visualization and internal productivity tools.

Senior Software Engineer at Google NewYork

July 2008 - March 2014 (5 years 9 months)

Working for various projects in online advertising. Focus on Display Ad Platform from 2010:

- * Biggest Ad Exchange Platform
- * Yield Management For Sellside
- * Next Generation Display Ads Data Infrastructure
- * Data Analysis / Data Visualization

Software Engineer Intern at Google

March 2008 - May 2008 (3 months)

Worked on advertiser related projects.

Software Engineer Intern at Google

July 2007 - September 2007 (3 months)

From July. 2007 to Sep. 2007 and From Mar. 2008 and May. 2008

Working for online advertising related projects.

Education

Sun Yat-Sen University

Undergraduate, Computer, 2004 - 2008

Activities and Societies: Maintainer of Sun Yat-Sen University's BBS Network Information Center Cisco Team Maxcell Online East
